---

## PROJECT

### E-Learning Management System

- Developed a basic online platform for students to access course materials and submit assignments.
- Implemented user login and registration functionality.
- Allowed students to view course content and submit assignments online.
- Created a simple interface for teachers to upload course resources.
- Technologies Used: Java, MySQL, HTML/CSS, JavaScript

### The House Rental System

- Developed a basic online platform for renting and managing properties.
- Provided property owners with the ability to list properties and handle tenant communications.
- Enabled users to search for properties, book viewings, and submit rental applications.
- Technologies Used: Java, MySQL, HTML/CSS, JavaScript
