## PROFILE

---

- I am **Manthan**, an enthusiastic **Information Technology** student in my final semester at **Ahmedabad Institute of Technology**, with a strong passion for **web development**. I am skilled in creating dynamic and user-friendly web applications, driven by a keen interest in building innovative digital solutions. My goal is to apply my technical expertise and creativity to design and develop impactful web experiences that address real-world challenges.

## PROFESSIONAL EXPERIENCE

---

### Internship In IBMSkillsBuild (1 Month)

- The primary objective of the IBM SkillsBuild Internship is to enhance participants technical and professional skills through hands-on experience with real-world projects in areas such as cybersecurity, data science, AI, and cloud computing.
- As part of my IBM SkillsBuild internship, I had the opportunity to design and develop a chatbot using **IBM Watson**. This project involved leveraging Watson's AI-powered capabilities to build a conversational agent capable of understanding and responding to user queries intelligently

## PROJECTS

---

### Random Password Generator

- As part of my journey in web development, I created a Random Password Generator using React.js to enhance my skills in frontend development and state management. This project allows users to generate secure and customizable passwords by selecting criteria such as length, inclusion of special characters, numbers, and uppercase or lowercase letters.
- Used Technology: React Js, Express js**

### Real Time Chat website(In Progress)

- Developed a real-time chat website that allows users to communicate with each other through text messages. The website was designed to support multiple chat rooms, user authentication, and message persistence, providing a seamless and interactive user experience
- Used Technology : React Js, Express js, Socket IO, MongoDB, Node Js ,Chakra UI**
